

## Autism Screening in Australia

Key dates	Survey open until September 30th 2026.
Participants sought	Practitioners from any discipline who conduct autism screenings with children under the age of four year as a part of their work role.
About	We want to find out more about current autism screening practices within Australia, which will help us to make recommendations for improved practice where needed.
What is involved	Complete an anonymous online survey that will present two hypothetical case studies for you to read and then answer a series of questions about. The survey is estimated to take approximately 30-40 minutes to complete.
How to get involved	Click the link or go to: <a href="https://tinyurl.com/autismscreening-in-Aust-study">https://tinyurl.com/autismscreening-in-Aust-study</a>
